ge_a2a.zip This is example how to access Agent on Gemini Enterprise via API. (A2A protocol) Step-by-Step: - Open “Google Cloud” - Open “Agent Registry” - Select your agent and copy A2A url from the agent detail. - access the agent via A2A Protocol with Authorization header. Must knwo: - The agent must be shared to the service account who call the request. Limitation: - it can do everything that A2A protocol accept to do.
